Acoustic Panels and Tiles: FAQs

Sounds Beautiful

Versatile EchoPanel[®] acoustic panels and tiles add color and style to any space while quieting rooms by controlling sound reflection. EchoPanel[®] panels and tiles are manufactured using recycled PET plastic bottles, eco-friendly dyes and no added urea formaldehyde adhesive, resulting in a Green Tag[™] - certified product which can help gain LEED[™] green building credits with almost no VOC emissions.

Q: What is Kirei EchoPanel[®]?

Kirei EchoPanel[®] is a decorative surface finish offering acoustic performance with a felt-like face finish. Panels and tiles are produced from 100% PET, with up to 60% recycled content.

Q: What is Kirei EchoPanel[®] used for?

The Kirei EchoPanel[®] can be used for wall covering, ceiling panels and blade systems, furniture design, and all types of architectural designs where acoustic performance is desired.
