

## LEED Information for EcoX and Xposed Slabs

### **Materials & Resources**

#### **MR Credits 4.1 & 4.2 – Recycled Content**

*This credit requires that a minimum of 10% (MR4.1) of the materials used on a project are derived from recycled content. An additional credit is achieved if 20% (MR4.2) of the materials used on a project are derived from recycled content.*

EcoX is comprised of both pre-consumer (also called post-industrial) and post-consumer recycled materials. The recycled material content by weight is approximately 70%.

Xposed is comprised of pre-consumer (also called post-industrial) recycled materials. The recycled material content by weight is approximately 25%.

#### **MR Credit 5.1 & 5.2 – Regional Materials**

*This credit requires that a minimum of 10% (MR5.1) of the materials used on a project are extracted, harvested and manufactured within 500 miles of the project site. An additional credit is achieved if 20% (MR5.2) of the materials used on a project meet these criteria.*

Most raw materials used in both ecoX and Xposed slabs are from sources within 500 miles of the manufacturing facility. All products are manufactured at Meld's manufacturing facility located in Raleigh, NC.

### **Indoor Environmental Quality**

#### **EQ Credit 4.1 - Low Emitting Materials, Adhesives and Sealants**

*This credit requires that all adhesives and sealants used in a project meet the corresponding VOC limits for indoor air quality. Sealants must adhere to the South Coast Air Quality Management District rule #1168.*

EcoX and Xposed products can be sealed with low VOC penetrating sealers or film forming coatings which fully comply with South Coast Air Quality Management District Rule #1168 requirements. Certification of VOC compliance is available from the sealer/coating manufacturer.

Re: Recycled Content

Dear Specifier:

This letter is to confirm that the following products contain the stated amounts of recycled content by weight:

EcoX: recycled glass and concrete countertop slabs: up to 70% recycled content  
Xposed: natural aggregate and concrete countertop slabs: 25% recycled content

The material above is manufactured in Raleigh, North Carolina.

A majority of the materials used in the manufacturing of the ecoX and Xposed slabs may have been sourced within 500 miles of the manufacturing location.

EcoX: 85-95%  
Xposed: 40-50%

*Note: Please contact manufacturer for the most recent information regarding percent of recycled content and regional materials.*

We thank you for your business and look forward to supporting your construction needs.

Sincerely,

Michael Bustin, VP of Sales
