## **TorZo Surfaces Product Limited Warranty**

TorZo Surfaces will warranty all properly installed TorZo Surface products to be free of material defects for a period of 10 years. The warranty covers all approved applications such as counter tops, bar tops, table tops, paneling, dividers and other standard furniture type applications. The warranty does not cover any exterior applications, or applications where the product is exposed to regular direct water contact such as showers and steam rooms.

TorZo Surfaces **does not** warranty product failure that was determined to be caused by faulty fabrication or installation practices. In addition, the warranty does not apply to damage that is caused by physical abuse, excessive heat or direct chemical contact. Examples of these types of damage include, but are not limited to, overly aggressive cleaning solution, prolonged exposure to excessive heat such as stove top or fireplace applications, the dropping of heavy objects directly onto the surface, or any weather related exposure such as rain.

This warranty provides for material replacement, or associated material cost, for the affected area only. It does not include the cost of removing the existing material, re-fabrication or installation associated with product replacement.

Customers seeking any warranty related product claims should contact the distributor where the original material was purchased.
