Sustainable Architectural Materials  
www.caragreen.com • 919.929.3009  
info@caragreen.com

### GENERAL INFORMATION

- Shou Sugi Ban is an ancient Japanese technique that translates to “burning cypress”
- This technique has re-emerged as a beautiful new interior and exterior cladding
- All materials are sustainably harvested and managed in the US
- Natural oils enhance the inherent grain and color, and can also be used to create stunning colors
- Charring creates a natural barrier that is fire, rot and pest resistant

### APPLICATIONS

- EXTERIOR siding (note: for exterior applications we recommend sealing all 4 sides)
- INTERIOR applications:
  - Walls
  - Ceilings
  - Millwork
- HAI & MOYASU are suited for interior applications

### STANDARD DIMENSIONS & MILLING

- CYPRESS: +/- 7/8" thick x 5-1/2" wide x 6-16' random lengths - S4S, T&G or standard ship-lap
- RED OAK/BLACK WALNUT: 3/4" thick x 5" wide x 2-10' random lengths - T&G
- RECLAIMED HEMLOCK: +/- 7/8" thick x 7" wide x 4-10' random lengths - S4S or T&G
- ACOYA: 3/4" thick x 5-1/2" wide x 8-16' random lengths - T&G
- WESTERN RED CEDAR: 3/4" thick x 5-1/8" wide x 6'-16' random lengths
- Custom widths and lengths available upon request
- Custom milling such as ship-lap with reveal available upon request

### GRADES

- #2 Common/Character (typical character marks such as knots, checks and pin worm holes)
- Select (highest quality - mostly clean though small knots, checks allowed)
- Cedar only available in Select Tight Knot (rustic), or Clear Vertical Grain (smooth face)

Nordstrom, Tora - Vancouver, BC

Smartwool Tradeshow, Yasai, Pinku, and Aka

Citizen Watch, Netsu - NYC
