GENERAL INFORMATION

- Shou Sugi Ban is an ancient Japanese technique that translates to "burning cypress"
- This technique has re-emerged as a beautiful new interior and exterior cladding
- All materials are sustainably harvested and managed in the US
- Natural oils enhance the inherent grain and color, and can also be used to create stunning colors
- Charring creates a natural barrier that is fire, rot and pest resistant

APPLICATIONS

- Exterior siding (note: for exterior applications we recommend sealing all 4 sides)
- Interior applications:
 - Walls
 - Ceilings
 - Millwork
- HAI, MOYASU, YOKO, KINOKO, NETSU, KURUMI, and DIABLO are suited for interior applications ONLY

STANDARD DIMENSIONS & MILLING

- **CYPRESS:** ± 7/8" thick × 5 1/2" wide × 6'-16' random lengths, S4S, T&G, or standard ship-lap
- **RECLAIMED HEMLOCK:** ± 7/8" thick × 7" wide × 4'-10' random lengths, S4S or T&G
- **RED OAK / BLACK WALNUT:** 3/4" thick × 5" wide × 2'-10' random lengths, T&G
- **WESTERN RED CEDAR:** 3/4" thick × 5 1/8" wide × 6'-16' random lengths, T&G, S4S, or standard ship-lap
- **KEBONY:** 7/8" thick × 5 7/8" wide × 8'-16' random lengths, S4S
- **ACCOYA:** 3/4" thick × 5 1/2" wide × 8'-16' random lengths, T&G
- Custom widths and lengths available upon request
- Custom milling such as ship-lap with reveal available upon request

GRADES

- #2 Common/Character (typical character marks such as knots, checks and pin worm holes)
- Select (highest quality - mostly clean though small knots, checks allowed)
- Cedar only available in Select Tight Knot (rustic), or Clear Vertical Grain (smooth face)
